DETAILED ACTION

1. Claims 1-46 are presented for examination.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C.

121:

I. Claims 1-31, 36-42 and 44-46, drawn to remotely determining the

configuration of a computer of a multimedia content user, classified

in class 709, subclass 222.

II. Claims 32-35 and 43, drawn to a method of determining a

connection speed of a computer, classified in class 709, subclass

224.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I, and II are related as subcombinations disclosed as usable

together in a single combination. The subcombinations are distinct from each

other if they are shown to be separately usable. In the instant case, invention I

has separate utility such as remotely determining the configuration of a computer

of a multimedia content user. Invention II allows determining a connection speed

of a computer. See MPEP § 806.05(d).

Art Unit: 2155

- 4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 5. A telephone call was made to Mr. William Frommer on February 1, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made because Mr. Frommer's secretary Laila Korde, requested the restriction election to be sent out.
- 6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
